### Executive Summary

#### HIGHLIGHTS

- Change of control in Q4 2017 strengthened the Group and Company solvency position.
- Company Solvency II ratio ('SCR ratio') of 135% as at 31 December 2017, increasing from 107% as at 31 December 2016.
- CG Holdings (Gibraltar) Limited ('CGH') and its subsidiaries (together, 'the Group') exited transitional measures in Q4 2017 on the change of control, reporting a SCR ratio of 123% at 31 December 2017.
- In 2017, the company preferred to focus on achieving a comfortable solvency buffer over short term profits as it positions itself for healthy long term growth. This resulted in a small loss after tax for the insurer, Casualty and General Insurance Company (Europe) Limited ('CGICE' or 'the Company').
- The Board of CGICE has agreed measures to ensure it can continue to write new, and administer existing, EU business after the UK exits the EU.

The Group is an insurance group made of up of CGH as an insurance holding company, CGICE as an insurance company, and various other entities which operate businesses which are ancillary to the insurance operations. The purpose of this report is to satisfy the public disclosure requirements under the Financial Services (Insurance Companies) (Solvency II Directive) Act (the Solvency II Act in Gibraltar) including the Delegated Regulations of the European Parliament. The elements of the disclosure relate to business performance, governance, risk profile, solvency and capital management. During 2017 a number of CGH shareholders sold their shares to new shareholders who now have majority control. CGH also sold Corin Underwriting Limited in September 2017. Early in 2018 CGH acquired the remaining shares it did not own in Hawkwell Motor Limited and is in discussions to sell this company on.

CGICE is the main driver of the Group's performance. The Board is satisfied with the performance of the Company during the year, which has achieved strong underwriting profits in the lines of business in which the Company continues to be active, albeit offset by the strengthening of the reserves in the classes that the Company has ceased writing, the revaluation of the properties the company owns, and an increase in expenses. The Board, following a review of the underwriting risk profile of the Company, took the decision to cease writing French dommages ouvrages and decennial business early in 2017. In respect of its UK motor business, the Company decided to cease writing new business in March 2017 as a result of the volatility created by the UK Lord Chancellor's decision to decrease the personal injury discount rate from 2.5% to minus 0.75%, but the Board continues to monitor future developments as the business environment settles down from this economic shock.

A material risk to CGICE's strategy is the UKs exit from the European Union on 29<sup>th</sup> March 2019. Uncertainties remain around the (potentially temporary) arrangements in place from that date, although it is assumed that the UK will exit the Single Market.

The Company is actively investigating alternative structures or arrangements to ensure that it can continue writing insurance in the EU, and continues to monitor the situation closely.

The governance and risk frameworks of the Group and the Company are detailed in this report. There have been no significant changes in the reporting period.

The Company has continuously complied with all aspects of the Solvency II regulations from the date of first implementation on 1 January 2016 and the most recent solvency position of the Company is presented above. The Group exited transitional measures during 2017. During the reporting period there have been no changes to the capital structure.

.

Date: 15<sup>th</sup> June 2018

Daniel Gibson Chief Executive Officer Casualty & General Insurance Company (Europe) Limited

### A. Business & Performance

#### 1. Business

- 1.1. This report relates to CG Holdings (Gibraltar) Limited ('CGH') and its subsidiary companies (collectively 'the Group'), specifically Casualty and General Insurance Company (Europe) Limited ('CGICE' or 'the Company'), an insurance company licenced in Gibraltar and limited by shares.
- 1.2. CGH is a non-regulated holding company domiciled in Gibraltar. Group supervision is carried out by CGICE's regulator:

Gibraltar Financial Services Commission PO Box 940 Suite 3, Atlantic Suites Gibraltar Tel: +350 200 40283 www.fsc.gi

1.3. CGH and CGICE's external auditor is:

EY Limited Regal House Queensway GX11 1AA Gibraltar http://www.ey.com/gi/en/home

CGH and CGICE prepare their audited financial statements in accordance with Generally Accepted Accounting Principles in the United Kingdom ('GAAP').

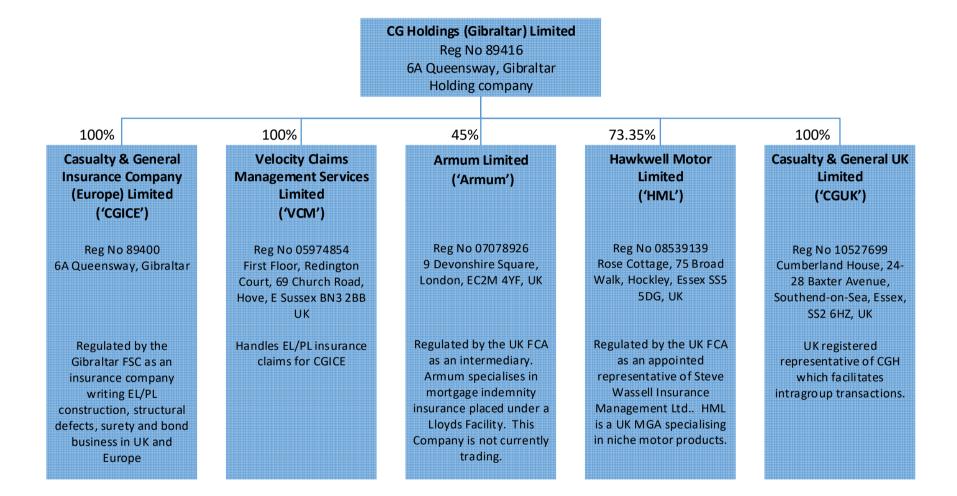

1.4. CGH shareholders with qualifying holdings at 31 December 2017:

Daniel Gibson Philippe Azoulay (through glce Limited and g Reinsurance Limited)

CGICE is 100% owned by CG Holdings (Gibraltar) Limited.

1.5. The CGH Group of companies is shown overleaf.

#### CGH Group Structure at 31<sup>st</sup> December 2017

Class	Type of insurance business	Jurisdiction
3	Land vehicles	UK
7	Goods in transit	France, Germany, Ireland, Netherlands
8	Fire and natural forces	Belgium, France, Germany, Ireland, Netherlands, UK
9	Damage to property	Belgium, France, Germany, Ireland, Netherlands, UK
10	Motor vehicle liability	UK
12	Liability for ships	France, Germany, Ireland, Netherlands
13	General liability	Belgium, France, Germany, Ireland, Netherlands, UK
15	Suretyship	France, Ireland, Italy, Norway, Spain, UK
16	Miscellaneous financial loss	France, Germany, Ireland, Netherlands, UK
17	Legal expenses	UK

1.6. CGICE is authorised to carry out insurance business in the following jurisdictions:

The majority of business written in other EU jurisdictions is via freedom of services, except for classes 8, 9, 13, 15 and 16 in France, and 8, 9, 13, 15 and 17 in the UK, which are written via branches in France and the UK respectively.

1.7. The material undertakings in the Group are CGH, as the insurance holding company, and CGICE, as the insurance company. The results and net assets of each of the material undertakings are as follows:

Undertaking	Profit/(Loss) (£'000)	Net Assets (£'000)
CGH	(216)	8,303
CGICE	(60)	11,944

The activities and sources of profit for each of these entities is covered further below:

- 1.7.1. CGH is a non-trading insurance holding company.
- 1.7.2. CGICE's source of profit is from underwriting activities and investment income, which is explained in further detail in this report.
- 1.8. In addition to the above material undertakings, whose contribution to the achievement of the Group strategy is via their core roles in the provision of insurance related undertakings, the Group also has VCM and Armum as operating subsidiaries. All three provide ancillary insurance services to the Group.

- 1.9. CGH sold Corin Underwriting Limited ('Corin'), an UK managing general agent, on the 18<sup>th</sup> September 2017, however Corin continues to fulfil intermediary services to CGICE in respect of the running off of the UK liability business.
- 1.10. Subsequent to the year-end, on 24<sup>th</sup> January 2018, CGH purchased the remaining shares in HML, changing its status from a joint venture to a fully owned subsidiary of the Group.
- 1.11. The control of the Group changed on the 8<sup>th</sup> November 2017. This had no impact on the risk profile of either the Group or the Company; the business plans remained the same. It did, however strengthen the solvency positions of both the Group and Company by approximately £2.6m and enabled the Group to exit transitional measures.

#### 2. Underwriting Performance

- 2.1. CGH's underwriting performance follows CGICE's as the only insurance entity in the Group.
- 2.2. The premium written in the year ended 31 December 2017 is shown below by class of business and jurisdiction:

	France	Ireland	Italy	Norway	Spain	UK
	£'000	£'000	£'000	£'000	£'000	£'000
Motor	-	-	-	-	-	2,179,208
Fire and property	198,507	7620	-	-	-	3,921,754
Liability	999,205	164,697	-	-	-	31,534
Credit & surety	3,414,793	-	883,658	1,693,508	2,339,106	-
Legal expenses	-	-	-	-	-	
Totals	4,612,505	172,317	883,658	1,693,508	2,339,106	6,132,496

- 2.3. The majority of premiums written are single premium policies (i.e. one single premium to cover the life of the policy).
- 2.4. Underwriting performance has been positive with technical profits reported in the management accounts for the year ended 31 December 2017 being £1,285k (compared to a profit of £3,602k in 2016).

#### 3. Investment Performance

- 3.1. CGH's investments comprise the equity holdings in subsidiaries and a joint venture only. There have been no distributions received from subsidiaries during the period of this report.
- 3.2. The investment assets held by the Company are illustrated overleaf:

#### CGICE - Investment Assets December 2017

- 4. Performance of Other Activities
- 4.1. There have been no other significant activities undertaken by the Group or the Company other than its insurance and related activities.
- 5. Any Other Information
- 5.1. There are no other material matters in respect to the business or performance of the Group or the Company.

## B. System of Governance

#### 1. General Information on System of Governance

#### CG Holdings (Gibraltar) Limited

CGH retains ultimate responsibility for the governance of itself and its subsidiaries, however it is not prescriptive in how any subsidiary should meet its obligations. CGH takes a risk based approach to the system of governance it expects to be implemented, depending on the complexity, nature, size of the business, whether it is subject to regulation, and the level of risk it presents to Group. The level of reporting required is also proportional to these factors.

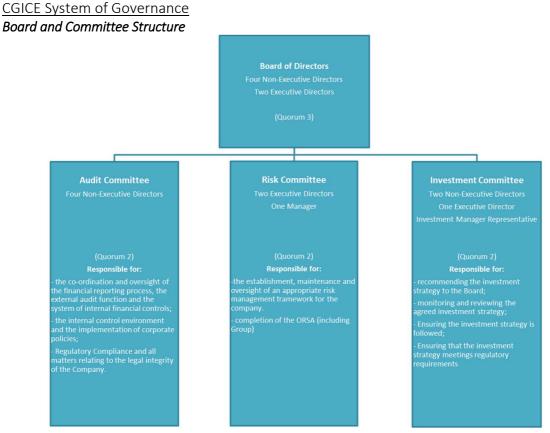

Governance requirements are largely set by regulatory and legal requirements, however CGH also considers any additional measures it considers necessary to manage the risk of the subsidiary and will implement these on a case by case basis, for example establishing additional governance meetings, requesting additional reporting, or intervening by placing managers or directors in the subsidiary to further safeguard CGH's interests.

There are CGH directors on all subsidiary Boards. CGH has no Committees.

CGH has no employees. Directors' services are included in the fee paid by CGICE.

There have been no dividends paid to the shareholders during the reporting period.

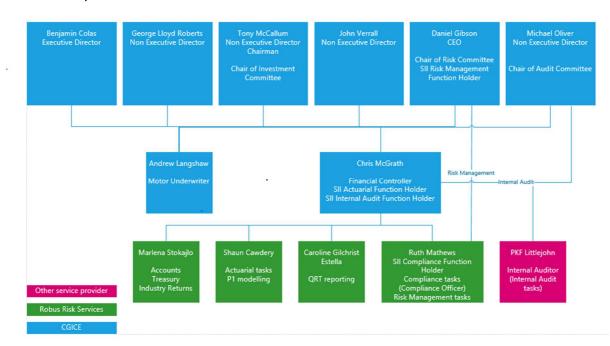

The CGH Board of Directors is comprised of two executive directors and three non-executive directors (one of which is the Chair).

10

Terms of Reference describe the purpose, responsibilities, membership and authority delegated from the Board for each Committee. Relevant attendees are invited to Committees as determined by the Committee.

The Motor Underwriting Committee was disbanded in the first quarter of 2017 due to the cessation of the Motor business, after which its responsibilities reverted to the Board.

#### Roles and Responsibilities

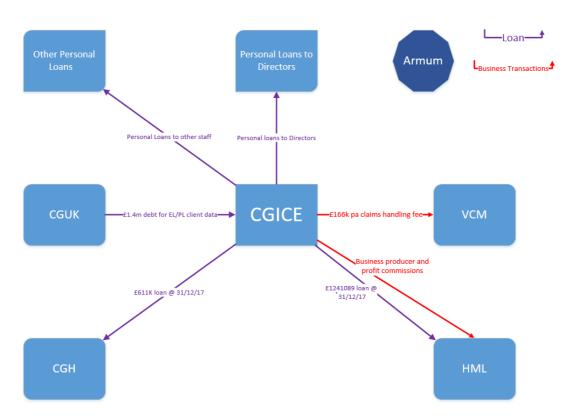

CGICE has four employees including the CEO. Employees' remuneration (bar the CEO's) is set by the CEO and approved by the Board as part of the budget. At least three Directors approve the remuneration of any other Director; no Director is involved in decisions relating to their own remuneration. The Company has a Remuneration Policy.

Directors fees or salaries were paid to the Non-Executive and Executive Directors during the reporting period.

There have been no dividends paid to the parent company during the reporting period.

#### Material Intra-Group Transactions

Material intra-group transactions are described by the diagram below:

#### 2. Fit and Proper Requirements

The Group recognises the value of the fit and proper requirements in that a company run in a fit and proper manner, by fit and proper directors and other individuals holding key functions or roles, will benefit from the knowledge and experience brought to the company and is more likely to be successful. In addition, the risks associated with a badly run business (largely regulatory, financial or reputational risks) will be diminished.

There is no definition for 'fit and proper', however the term includes amongst other considerations the concepts of honesty, solvency and competence.

The basic elements of the fit and proper assessment are:

- honesty, integrity and reputation (e.g. treating customer fairly, proper respect of legal, regulatory and professional obligations, prudent approach to business);
- competence, ability to conduct business and organisation (e.g. adherence to 'four-eyes' principle, having a robust corporate governance structure, declaration of conflicts of interest, Directors having appropriate skills, knowledge and experience);
- financial position (e.g. ensuring the Company has sufficient financial resources to meet commitments on a continuous basis, and is robust enough to withstand business risks)

The Group Boards ensure that any candidates for a position on a Board, or for other key functions or roles, shall be assessed to ensure that they fulfil fit and proper requirements. This includes reviewing the CV of the candidate, an in-depth interview, obtaining references (both personal and professional),

and carrying out due diligence checks. Due diligence checks include verification of identification and address, and searches on due diligence databases. The candidate is also asked to declare any interests so the relevant Board can review whether they conflict with the Company's interests. All conflicts of interest identified are recorded on a Log and reviewed at each board meeting.

#### 3. Risk Management System including ORSA

#### CG Holdings (Gibraltar) Limited

CGH is responsible for ensuring that risk management is implemented within each subsidiary at a level proportionate to the complexity, nature, size of the business, whether it is subject to regulation, and the level of risk it presents to Group.

As a minimum, all regulated companies will have a Risk Register which will be reported on in subsidiaries' reports to the CGH Board. CGH will also identify any risks specific to Group or aggregated at Group level through the interdependencies between the subsidiaries including intra-group transactions, and considering risk concentration, through the Own Risk and Solvency Assessment ('ORSA') process.

CGICE completes the Group solvency calculation and monitors Group solvency on behalf of CGH and will liaise with the Group Board as necessary to ensure that the Group SCR is met and that risks to Group solvency are monitored and managed.

CGICE is responsible for completing an Own Risk Solvency Assessment ('ORSA') for the Group, incorporating CGH and a solo ORSA on CGICE. One supervisory report on both ORSAs is collated.

#### CGICE Risk Management System

#### Risk Management Roles and Responsibilities

The CGICE Board delegates its risk management function to the risk management key function holder and to the Risk Committee, which oversee all risk related activity and ensure the Board is kept informed or is consulted as required.

Should any risk management tasks be outsourced, the function holder is also responsible for the outsourced relationship, including monitoring the scope of work, service levels and for challenging the results.

The key function holder and RC review, monitor and update as required, all the components of the Framework, engaging other members of the Board, key function or key role holders, as necessary, and oversee the ORSA process. However, the Board collectively are responsible for the implementation of the Frameworks components.

The Risk Register is a central log of all risks identified in the business. It is owned by and is the responsibility of the RC and risk management key function holder to maintain and review the document. It includes the risk owner, risk description, risk factors, mitigating controls and measures and risk appetite.

The Board sets its risk appetites and tolerances; the actual risk in the business, compared to risk appetite and tolerance, is monitored by the RC and escalated to the Board if required.

#### The Risk Management Process

The process of risk management is a continuous and systematic one, comprising 5 elements:

#### Own Risk Solvency Assessment ('ORSA') Policy

The ORSAs' main purpose is to ensure that the Group and CGICE assess all the risks inherent to their businesses and determine the corresponding capital needs, or identify other means needed to mitigate these risks. The Boards are responsible for conducting the ORSA.

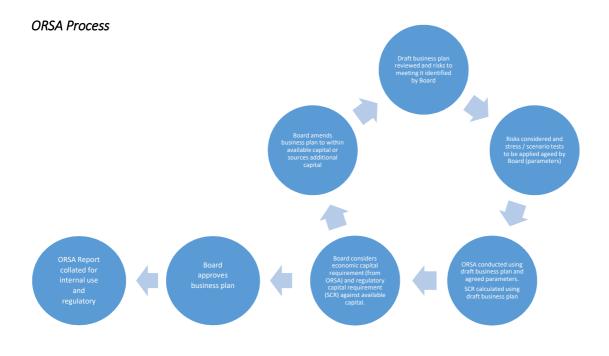

In particular the ORSA considers situations in which the Group or Company may be stressed, and the capital needs and mitigation measures necessary in these scenarios, to ensure that the business is prepared for, and robust enough to weather, adverse conditions without detriment to stakeholders.

While the Risk Register focusses on risks from a bottom-up viewpoint, the ORSA takes a top-down approach, linking business objectives, business risks, business planning and capital planning. The results of the ORSA also feed back into the risk management process, ensuring that all risks identified are incorporated into the assessment, management, monitoring and reporting cycle.

The Boards will also use the output of the ORSA to review its overall risk profile, and whether the profile exceeds or approaches the risk tolerance limits set by the Boards.

The Boards carry out an ORSA at least annually; however, they will also carry out an ORSA if there is any material change to the risk profile or business plan, in particular:

- Cessation of a class or entering into a new class worth >£2.5m GWP
- If the SCR changes by >10% (which includes the impact of changes to investments)
- If there are any significant changes to Group structure e.g new subsidiaries/liquidation of subsidiaries

#### 4. Internal Control System

#### CG Holdings (Gibraltar) Internal Control System

CGH Board is responsible for the Group Internal Control System. Internal controls are implemented within each subsidiary at a level proportionate to the complexity, nature, size of the business, whether it is subject to regulation, and the level of risk it presents to Group.

As a minimum, all companies will have sound reporting and accounting procedures to enable the respective Boards to adequately monitor their business. The majority of subsidiaries are subject to statutory audit which independently reviews their internal control systems.

#### CGICE Internal Control System

The Company's internal controls are part of its compliance framework, being the first line of defence in the 'three lines of defence' model the Company has implemented.

The Company has implemented policies which describe the Board's approach to key areas of the business, and procedures, where appropriate, which describe how the Board fulfils its policies. The Board is ultimately responsible for overseeing and maintaining the adequacy and effectiveness of the internal control system, however day-to-day oversight is provided by the compliance key function holder and Compliance Officer. In practice, the Audit Committee ('AC'), other Directors and key role holders also necessarily participate in the management of the system.

The Compliance Officer is responsible for ensuring that all company policies are reviewed at least annually to make certain that they are still fit for purpose, in liaison with the Directors as appropriate. The relevant area of the business is responsible for ensuring that their procedure(s) are up to date and reflect how the business operates.

There is a risk based Compliance Monitoring Programme ('CMP') in place to check that CGICE fulfils all its legislative and regulatory requirements. This is completed by the Compliance Officer on a quarterly basis and forms part of the Compliance Report to the AC.

#### **Compliance Function**

The Compliance key function holder is responsible for the completion of compliance tasks, although the tasks may be outsourced to the Company's insurance manager. The function holder is also the Compliance Officer ('CO') and has direct access to both the Board and the AC.

The CO is responsible for identifying and evaluating compliance risk, overseeing the implementation of controls for the risks identified, and monitoring their efficacy through the Compliance Monitoring Programme. The CO reports to the key function holder and AC at each meeting and will provide advice to the business when requested.

The Compliance Function also liaises with regulatory bodies and authorities and provides updates on changes in legislation and regulatory requirements.

The Board supports the Compliance Function and shall make available such resource as is necessary, and provide access to all relevant documentation and information from the business, for the Compliance Function to fulfil its aims.

#### 5. Internal Audit Function

#### CGH Internal Audit Function

All high risk Group companies are service providers to CGICE, and are therefore considered by CGICE's internal audit function and included in CGICE's internal audit activity, which is described below.

#### **CGICE Internal Audit Function**

Internal Audit exists to provide the Company with independent assessments of the quality of internal controls and administrative processes, and provide recommendations and suggestions for continuous improvement. It provides advisory services to management, will conduct investigations on an ad hoc basis as requested by management, and has responsibility for assisting in the development and operation of the risk management framework. It will also audit providers of material services to ensure that the agreements governing these relationships are being adhered to.

The Board appointed Internal Audit Key Function Holder has responsibility for the internal audit function and reports into the AC. Internal audit tasks are outsourced to a third-party provider selected by the AC; the key function holder also has responsibility for co-ordinating this outsourcing and challenging the results.

The third-party provider prepares an internal audit plan for the following year which is based on a three-year plan, and is developed using a risk based approach to prioritise high risk areas and the extent and frequency of audits. The plan is approved by the AC and provided to the Board for formal adoption. The plan is subject to change throughout the year depending on the business and changing risk environment.

Audit reports are produced after each internal audit and provided to the AC for review with management responses. Any actions coming out of the audits are monitored to completion by the AC.

Internal Audits will be conducted by appropriately skilled, experienced and independent persons to carry out the audit to the AC's standards.

To carry out its work effectively and to retain integrity of the function, Internal Audit acts independently of line management. The internal audit function holder is responsible to the AC for the planning, management and performance of Internal Audit; the AC consists of Non-Executive Directors.

The AC provides a quarterly report to the Board.

Internal Audit reports may be requested by appointed External Auditors, these requests are considered by the AC for approval.

#### 6. Actuarial Function

CGICE is the only insurance entity in the Group and therefore the only one for which it is relevant to have an actuarial function, however CGICE's actuarial function supports Group activity where required, for example the Group solvency calculation and ORSA.

CGICE's actuarial function is the responsibility of the key function holder, who reports directly to the Board.

The actuarial function is responsible for:

- a) Coordination of the calculation of technical provisions;
- b) ensuring the appropriateness of the methodologies and underlying models used as well as the assumptions made in the calculation of technical provisions;
- c) assessing the sufficiency and quality of the data used in the calculation of technical provisions;
- d) comparing best estimates against experience;
- e) informing the Board of the reliability and adequacy of the calculation of technical provisions;
- f) expressing an opinion on the overall underwriting policy;
- g) expressing an opinion on the adequacy of reinsurance arrangements; and
- h) contributing to the effective implementation of the risk-management system.

Each of these activities is undertaken on an at least annual basis and the outcome reported to the Board in an internal actuarial report.

#### 7. Outsourcing

Outsourcing is the use of a third party (either an affiliated entity within the same group or an external entity) to perform activities on a continuing basis that would normally be undertaken by the company. The third party to whom an activity is outsourced is a 'service provider'.

Each Board shall ensure that an outsourcing arrangement shall not diminish the company's ability to fulfil its obligations to customers or its regulator, nor impede effective supervision by its regulator (should it be regulated).

Fundamental responsibilities such as the setting of strategies and policies, the oversight of the operation of the company's processes, and the final responsibility for customers, shall not be outsourced.

The respective Boards consider outsourcing where they believe that there is an advantage to the company and customer by using a service provider e.g. access to specialist resource, provision of services in the same jurisdiction as the customer, cost benefits.

#### CGH Outsourcing

CGH is a holding company and has little operational activity. The company's management is outsourced to RRS, primarily consisting of the provision of the accounting function. Company Secretarial services are outsourced to GT Fiduciary Services Limited.

#### CGICE Outsourcing

CGICE is reliant on a number of material service providers; due to the risk this presents, CGICE has an outsourcing policy which describes how it takes the decision to outsource, how a service provider is selected, and how the relationship is defined, managed and monitored. The Company takes a risk based approach to all of these activities.

Service Provider	Service Provided	Jurisdiction
		Located
Robus Risk Services (Gibraltar) Limited	Insurance Management (compliance tasks, risk management tasks, accounting, banking & investments, regulatory reporting, actuarial tasks)	Gibraltar
iWCL Consultancy Limited	UK EL/PL policy administration software system	UK
Hawkwell Motor Limited	UK motor policy sales and administration and complaints handling	UK
Endsleigh Insurance Services Limited (t/a TCS)	UK motor claims handling (from 04/01/2017)	UK
Slater Gordon (UK) LLP	UK motor claims handling (to 03/01/2017)	UK
European Brokers Alliance Limited (Nexus)	Policy sales and administration for French construction and Italian and Spanish bond lines	UK
CRL Management Limited	Policy sales and administration, and claims handling, for UK structural defects line.	UK
SARL DEKATRIA (SARL EKWI)	French Dommages Ouvrages (DO) and Decennale liability claims handling and administration	France
JFG Consulting EURL	Audit and inspection of IMS Expert managed claims (DO claims prior to 2010 and all Decennial claims (to Dec 2017))	France
IMS Expert Europe SA (previously SFS Europe SA)	French construction claims handling (prior to 2010) (to August 2017)	France

#### Material Service Providers in the Reporting Period:

Velocity Claims Management Limited	UK & ROI EL/PL claims handling	UK
IAM Insurance AS	Policy sales and administration, and claims handling, for Norwegian bond line.	Norway
GT Fiduciary Services Limited	Company secretarial	Gibraltar

#### 8. Adequacy of the System of Governance

The Group aims to continuously improve its compliance and governance systems by ensuring that they are reviewed, evaluated, and recommendations are made to the Board(s) regarding enhancing and developing the systems, including the outcomes from compliance monitoring programmes, root cause analysis from complaints, breaches and risk events, and incremental development as the systems mature. It also considers relevant industry advice and guidelines, for example the UK Financial Reporting Council's Corporate Governance Code, implementing these as appropriate for the size and complexity of the Group companies.

Internal audits and external audits provide independent evaluation of the Group's and individual companies' system of governance. Recommendations from these audits are considered by the relevant Boards and implemented proportionate to the business' risks.

## C. <u>Risk Profile</u>

#### 1. Underwriting Risk

CGICE is the only company in the CGH Group which is exposed to underwriting risk, the Group's underwriting risk is therefore the same as CGICE's.

#### CGICE

Underwriting risk is a key risk to CGICE.

Underwriting risk is monitored by the executive director who reports to the Board at least quarterly, and by the Risk Committee and Risk Management Key Function Holder, via the Risk Management Framework. It is assessed and monitored using key indicators such as Gross Written Premium, claims reserves, loss ratio and large loss claims details. The Board has set risk tolerances around these indicators, where relevant, which the RC monitors.

The Company sells its insurance through intermediaries who have been granted limited delegated authority by the Board. Intermediaries are monitored by the Executive Director on the basis of management information, and are also encompassed by the Internal Audit Plan, to ensure adherence to contractual requirements including delegated underwriting authority parameters. Broker reviews are also conducted on a risk assessed basis. The results are reported to the Board or Audit Committee, as appropriate.

There has been no change to the methodology for identifying, assessing, managing and reporting on underwriting risk over the reporting period.

The use of quota share and excess of loss reinsurance is CGICE's primary method of mitigating underwriting risk.

In 2017 the Company continued to manage and mitigate the business' risk exposure to within its risk appetite and capital capacity. As such, French dommages ouvrages and decennale insurance lines were put into run-off during the year. The Company ceased writing the UK motor book in March 2017 following the decision by the UK's Lord Chancellor to reduce the personal injury discount rate from 2.5% to minus 0.75%, and the market volatility which followed. The Company continues to monitor future developments.

The Company is focussing on its European surety and bond, and Norwegian construction defects business over the next three years.

The Company has written employer and public liability business in the UK as well as UK motor and therefore is exposed to the risk of structured settlements (sometimes called periodic payment orders or PPOs) in relation to large claims. The risk of PPOs to the Company is that they transfer the longevity (how long the PPO must be paid), inflation (how quickly the annual payments increase) and revision (possibility of future changes in legislation which may change PPO awards) risks to the Company. To date there have been no settled PPOs awarded to claimants against the Company. The Company reviews its large claims and assesses the risk of them developing into PPOs, but currently has no such claims which would typically develop into settled PPOs, and in any case is protected via the mitigation methods described below. The Company believes that the risk of PPOs has diminished further since the UK Lord Chancellor's announcement in February 2017 regarding the change in the personal injury discount rate to minus 0.75%, which is detailed further in section 7 below, and the Company has since ceased writing these lines of business.

#### **Underwriting Risk Mitigation Measures**

Line	Mitigation Measure				
Employers Liability and Products Liability	Excess of loss reinsurance;				
(in run off from 01/01/17)	• 75% quota share reinsurance.				
UK Motor	Delegated authority limits;				
(in run off from 01/04/17)	<ul> <li>Excess of loss reinsurance;</li> </ul>				
	• 75% quota share reinsurance.				
Dommages Ouvrages	<ul> <li>Delegated authority limits;</li> </ul>				
(in run off from 01/01/2017)	Variable quota share reinsurance;				
	Recovery from decennale insurer.				
Decennale	<ul> <li>Delegated authority limits;</li> </ul>				
(in run off from Oct 2017)	Maximum exposure limit per site o				
	€500,000.				
French Surety	Recovery through counterparty guarantees;				
	Control of project bank accounts and				
	therefore cash flow;				
	Option to take control of the project to				
	completion.				
Italian Bonds	<ul> <li>Delegated authority limits;</li> </ul>				
	65% quota share reinsurance.				
UK Structural Defects	Excess of loss reinsurance.				
Irish and Spanish Surety/Bonds	Volume very small so no mitigation measure				
	necessary.				
Norwegian Construction Defects	Credit memo prepared for larger risks which				
	are signed off in Gibraltar;				
	Facultative reinsurance limiting exposure to				
	maximum £1.5m per client.				
UK Legal Expenses	100% quota share reinsurance.				

There has been no material change to the risks that the Company is exposed to in the reporting period or to date other than as disclosed above.

#### 2. Market Risk

CGH has no exposure to market risks as it holds funds in cash only.

#### CGICE

The Company engages an investment manager who is represented at all Investment Committee ('IC') meetings, and provides detailed analysis of the investment portfolio, making recommendations to maximise investment returns within the Company's risk appetites and tolerances.

#### Currency

The Group and the Company are primarily exposed to two currencies, the Euro ("EUR") and British Sterling ("GBP"). Investments are held in GBP and EUR and therefore also present some currency risk to the Company. The Company holds a Euro cash account for Euro premium funds and claims payments, to minimise the number of currency exchanges necessary, however it is exposed to

currency risk as its accounting currency is GBP and the exchange rate affects the value of transactions and balances. The Company also trades in a Norwegian Krone, but its exposure is not material.

RRS monitors the EUR:GBP exchange rate on a monthly basis or more regularly where there are significant movements in the currency pair, assesses the currency risk on behalf of CGICE, and will make recommendations via consultation with representatives of the Board regarding when to make foreign exchange transactions to mitigate the risk. The IC evaluates the efficacy of the mitigating measures in place and considers the additional use of a foreign exchange 'tunnel' (a combination of foreign exchange option contracts which limits benefit from favourable movements in foreign exchange and but also limits losses from adverse movements).

The currency risk has fluctuated considerably over the reporting period due to the economic conditions in the EU and the UK.

#### Property

The Company has a commercial property portfolio of £6,555m; the properties are leased on a longterm basis to secure tenants and are geographical spread to mitigate loss of income, catastrophe and concentration risk. However, especially following the UK's departure from the European Union, the property market could become more volatile and therefore increased liquidity risks may emerge. The new shareholders' appetite for property risk led to the Company deciding to divest itself of its property portfolio and this process commenced in quarter 4 of 2017 and continues, subject to the purchase price being commensurate with the booked value.

The material risks presented by the property portfolio have not significantly changed over the reporting period, but are anticipated to decrease going forwards due to the afore-mentioned sales.

The IC assesses and monitors the risks presented by the property portfolio, ensuring that they lay within, and are made in accordance with, the Company's risk appetite, and are balanced within the overall portfolio to ensure efficient use of capital and mitigation of liquidity risk.

#### Interest rate

Interest rate risk arises as a result of the impact of interest yield curves on future payments to be made in respect of claims and receipts from the Company's investments. The interest yield curves in the UK have decreased in the reporting period which reflects the decreases in base rates applied by the Bank of England. While interest yield curves were suppressed following the UK's referendum and the US Presidential election, recent increases in US Federal Reserve rates have seen interest yield curves increase moderately in the fourth quarter, although continuing economic uncertainty in the UK and Europe around Brexit negotiations continue to keep rate expectations low in the UK.

The Company's exposure to interest rates arises primarily from bond portfolios (as bond values are susceptible to changes in interest rates), and the settlement of future claims (as the discount rates applied to claims settlement projections are impacted by interest yield curves). The bond portfolio was liquidated in June 2017.

Interest rate risk is assessed and monitored by the IC. The Company considers the prudent person principle (see [4]) in considering the investment assets and how they match to the expected payment profile of the Company's technical liabilities. Maximum duration limits (seven years) are also imposed on conventional fixed income assets in order to ensure that interest rate exposure on the bond portfolio is appropriate, while the property portfolio assists in hedging against longer term changes in the interest rate yield curve. The IC reviews the effectiveness of the mitigating measures, considers how they could be improved, and makes recommendations as appropriate.

#### Concentration

The IC reviews the investment portfolio and assesses the concentration risk that the Company is exposed to, to ensure that it is within the risk appetite. The concentration exposure arises in respect of positions taken in the Company's bond portfolio, property exposure and counterparties in respect of its cash holdings and reinsurance recoveries. Concentration exposure is assessed in respect to exposure to any single name. In respect to properties, concentration exposure is considered where the individual properties are part of the same building. Concentration exposure is calculated based on the proportion of the single name exposure (or grouped property exposure) relative to the investment assets as a whole.

Concentration risk has not materially changed over the reporting period as the investment profile has remained consistent. Bonds have been sold.

The Company is exposed to concentration risk in respect of loans with other Group companies and to other related parties. Management monitors such exposures carefully and, where appropriate, obtain security via registered charges over assets.

Ongoing monitoring of concentration risk is undertaken by IC and by the Risk Management Framework, including assessing the efficacy of controls and whether they require improvement or additional mitigating measures are required, to ensure the risk remains within risk appetite.

Concentration of counterparties in respect of cash and reinsurance exposures is considered with credit risk in section 0.

#### Spread

Spread risk is the sensitivity of the values of investments, primarily bonds and secured loans in respect of the Company, to changes in the level or in the volatility of credit spreads. As credit spreads will typically be narrower for well rated securities than for poorly rated securities (and for short duration rather than long duration securities), the Company considers credit quality limits to the conventional fixed income assets in their investment guidelines to the investment manager.

The Investment Policy and risk appetites are reviewed regularly to ensure that the mitigating guidelines in place are still appropriate for the Company and the risk environment in which it operates.

The IC reviews the investment portfolio and assesses a value-at-risk ("VaR") given the duration and rating of the underlying assets, based on the expected loss with a 99.5% level of confidence. This is therefore considered the likely loss in the portfolio in a 1-in-200 year event. This assessment is undertaken in conjunction with the Company's investment manager.

Ongoing monitoring of spread risk is undertaken by IC and by the Risk Management Framework, including assessing the efficacy of controls and whether they require improvement or additional mitigating measures are required, to ensure the risk remains within risk appetite.

#### Equity

The Company does not invest in listed market equities due to their potential volatility, especially at times of financial stress. Part of its portfolio is invested in strategic equity fully controlled by the Group, with a fixed remuneration based on preference shares.

#### 3. Credit Risk

Credit risk is the risk that a counterparty will be unable to pay amounts in full when due.

#### <u>CGH</u>

CGH is exposed to very low levels of credit risk through amounts held with banks. This is mitigated by using financial counterparties with a credit rating of at least 'A', with the exception of operational bank accounts with The Royal Bank of Scotland, which is rated 'BBB'.

#### CGICE

Key areas where the Company is exposed to credit risk are:

- Reinsurers' share of insurance liabilities;
- amounts due from reinsurers in respect of claims already paid;
- amounts held with banks and other financial institutions;
- amounts on loan to connected parties; and
- amounts due from insurance intermediaries.

#### Reinsurance and Financial Institutions

All reinsurance and financial counterparties used have a credit rating of at least 'A'. The Company partners with a limited number of counterparties, reducing exposure and mitigating contagion risk.

CGICE has entered into a 50% whole account Quota Share agreement with one of its new Shareholders, a Guernsey based company. This company is unrated so the transaction is on a funds withheld basis.

Reinsurer credit ratings on the current and historic programmes are monitored on a quarterly basis and reported to the Risk Committee; any material deterioration is escalated to the Board.

#### Loans to Connected Parties

CGICE has made loans to CGH for investment in other Group subsidiaries (Armum and Corin), and to cover expenses; and directly to HML. The default risk on these loans is linked with the success of these companies which is mitigated by the entities all being CGH subsidiaries in that the companies' interests align.

Personal loans have also been made to members of staff and Directors. Personal loans to staff are not a risk as they are of relatively low value and spread amongst a number of employees. Directors' loans also do not present a material risk in that they are secured on assets.

The quantum of these loans is very small when considered against the entire balance sheet.

#### Amounts due from insurance intermediaries

Credit risk is presented by the use of insurance intermediaries as premiums have to be collected from the policyholder and paid to CGICE. Credit risk therefore occurs when the policy has incepted but the policyholder has not yet paid (so the intermediary cannot pay the insurer for time on risk), and when the policyholder has paid and funds are due from the intermediary.

Intermediary credit risk is mitigated by all intermediary relationships being governed by contractual agreements which specify payment terms. The executive directors review amounts owed closely, and use these to monitor and manage intermediaries' performance, escalating to the Board where necessary. Relationships with intermediaries can be terminated if contractual payment terms are not met.

Credit risk is also identified, assessed and monitored through the Risk Management Framework (see above for further details), which also necessitates regular review and evaluation of the mitigation measures in place to ensure the risk remains within risk appetite, and by the Board.

#### 4. Prudent Person Principle

The Group and the Company are required to invest the assets used to cover the minimum capital requirement and the solvency capital requirement in accordance with the 'prudent person principle'. The prudent person principle defines that the assets must be invested in a manner that a 'prudent person' would – that is that the decisions are generally accepted as being sound for the average person.

The Group and the Company forecast the cash needed over a three-year horizon based on the three-year business plan, taking into account liquidity of the assets.

The assets of the Company are distributed as disclosed in Section A 3 and transitions based on underlying exposure are detailed in Section D 1. There are no material other financial instruments held by other companies in the Group.

#### 5. Liquidity Risk

Liquidity risk is the risk that cash may not be available to pay the obligations when they are due.

<u>CGH</u>

CGH has liquid assets only so is not exposed to any liquidity risk.

#### CGICE

The IC is responsible for monitoring and managing liquidity risk, ensuring that CGICE has liquidity available to meet both immediate and foreseeable cash flow requirements. The Company's insurance manager is responsible for day to day operational liquidity management. The business is cash flow positive which means that premium income will normally more than offset claims outflows. The investment portfolios do not therefore tend to be called upon to meet claims. However, in the interests of prudence, the majority of the portfolio is invested in very liquid instruments and funds so as to make it possible to liquidate at least 65% of the portfolio in 3 days without abnormal cost, per the Investment Policy.

The expected profit included in future premiums is £1,785k.

#### 6. Operational Risk

CGH

CGH is exposed to a low level of operational risk, being an holding company which outsources its operational functions to a company manager, RRS. This risk is mitigated by RRS having a comprehensive Business Continuity Plan in place. It is also exposed to a low level of crime risk, which is mitigated through the operational procedures RRS has in place around the finance function (e.g. two authorisers on payments) which are reviewed as part of CGH's external audit.

There have been no material changes to operational risk in the reporting period.

#### CGICE

CGICE's key operational risks are:

- Key person risk: the risk of losing knowledge, skills and leadership should a key person leave the Company. The risk of the CEO leaving is mitigated by key person insurance, however there are other employees who would cause business interruption if they left and therefore this risk has been mitigated by an own assessed capital allocation to cover the cost of recruiting a replacement.
- Material service provider risk: the risk that a provider of key services is unable to operate, effecting CGICE's ability to service customers and sell policies. This risk is mitigated by having contracts in place which govern CGICE's relationships with service providers and include service levels which must be met, and an Outsourcing Policy which details the Company's approach to managing service providers. Should any service provider go into liquidation it is likely it would continue as a going concern for the immediate future, giving time for an alternative provider to be sourced. It is further mitigated by an own assessed capital allocation to cover the cost of replacing a service provider and any potential resultant loss of profit.

• Reputation risk: The Company has identified two types of reputational risk:

*Commercial reputation* – CGICE sells insurance through brokers and it is the reputation with those brokers that is key to their business. This is protected, and the risk to it mitigated, by appropriate policies and procedures (e.g. complaints procedure) and by having the French and UK branches (a presence in the jurisdiction increases confidence). The cessation of the EL/PL book will also reduce CGICE's reputation risk. If this risk materialises it would likely be short to medium term in effect (the Company regaining brand confidence over time), but could result in reduced volume and potentially reduced profit.

*Company reputation* – this is a more general reputation risk for the company as a regulated entity. For example, if Gibraltar insurers fail it impacts the reputation of all Gibraltar insurers. It is more intangible and largely out of the Company's control, so difficult to mitigate.

Both types of reputation risk are further mitigated by an own assessed capital allocation to cover potential loss of profit caused by reputational risk materialising.

- Reinsurance risk: the remaining reinsurance risk, not encompassed above, is if expected reinsurance recoveries are not realised due to misinterpretation of contracts. An own assessed capital allotment has been made to mitigate this risk.
- Operational risk: since CGICE has a broker based business model, many day-to-day activities are carried out by service providers. CGICE manages this risk by implementing an Outsourcing Policy, monitoring their performance, and reviewing their business contingency plans (BCP) to ensure they are adequate. CGICE also has its own BCP which is tested. Data can be restored very quickly with minimal impact on the business. The Company is reliant on bespoke software to administer EL/PL policies; an own assessed capital allocation has been made to mitigate the risk of this software failing and processes having to be done more manually.
- Distribution channel risk: The different lines of business sold through different intermediaries reduces CGICE's reliance on any one source of income, and mitigates distribution concentration risk. Most intermediaries could be replaced quickly, but this could result in loss of income and associated profit, and therefore an own assessed solvency allocation has been made to mitigate this potential loss.
- Crime risk: All service providers are expected to have appropriate anti-financial crime policies and procedures in place and these are included in any internal audit. They would be liable for any cost related to crime that they were responsible for and affected the Company. The Company adheres to the 'four-eyes principle' which is that at least two people are required to sign off on significant business decisions. Training is provided to all relevant staff, including Directors. The most significant crime risk is from brokers issuing fraudulent policies or fraudulent loss adjusting on claims. These instances are mitigated by the screening and

monitoring of intermediaries, and the professional indemnity insurance they have, and by the high degree of involvement CGICE has in claims handling. They have been further mitigated by allocating own assessed capital.

Operational risk within CGICE is identified, assessed and monitored through the Risk Management Framework which is overseen by the Risk Committee.

There have been no material changes to the operational risks the Company is exposed to over the reporting period.

#### 7. Other Material Risks

#### 'Brexit'

The risk of the UKs' exit from the EU resulting in CGICE no longer being able to sell insurance in the EU, or be able to service previously incepted EU policies.

The terms of the UK's exit from the EU, and arrangements for continued trade with the EU have still not been clarified, however the draft legal text of the UK withdrawal from the EU, including transitional arrangements, has been published. It is assumed that the UK will exit the single market. It includes a clause which allows Spain veto over the application of any future UK/EU trade deal to Gibraltar. Spain and the UK continue discussions on Gibraltar and hope to reach agreement before October, when the Brexit deal is due to be signed.

Post year end, in March 2018, the UK government confirmed that Gibraltar would continue to have access to the UK market for financial services on the same basis as currently, until 2020. In the meantime the two governments will work to design and implement a replacement framework for after 2020.

The Company is actively investigating alternative structures or arrangements to ensure that it can continue writing insurance in the EU, it being heavily exposed to European business. At the time of writing, CGICE has received tenders from Luxembourg, Malta and Spain to set up a new insurance vehicle and a decision will be made shortly on the best route forward.

The Board continues to monitor this risk closely.

## D. Valuation for Solvency Purposes

#### 1. Assets

#### 1.1. As at 31 December 2017, the Group held the following assets:

	GAAP		Solvency	Solvency		
	Accounts	Look Through	reclassification	Valuation Adj.	Solvency Value	Explanation of
Asset Class	Value (£'000)	(£'000)	(£'000)	(£'000)	(£'000)	differences
Tangible and intangible assets	42	-	-	(42)	-	See [1.3.1]
Property	6,555	-	-	-	6,555	See [1.3.2]
Bonds and secured loans	700	1,359	1,940	-	3,999	See [1.3.3]
Collective investment schemes	-	-	-	-	-	See [1.3.4]
Equity investments	6,922	-	70	-	6,992	See [1.3.5]
Intermediary and reinsurance receivables	10,908	(4,780)	(6,128)	-	-	See [1.3.6]
Related company receivables	1,230	-	(1,230)	-	-	Not applicable

Related company receivables	4,148	-	-	-	4,148	Not applicable
Reinsurers share of unearned premiums	11,752	-	-	(11,752)	-	See [1.3.7]
Reinsurance share of claims reserves / Reinsurance share of technical provisions	32,860	-	(1,794)	9,824	40,890	See [1.3.7] and [2.5.2]
Other technical provisions	1,362	-	-	(1,362)	-	See [1.3.7]
Cash and equivalents	21,503	(3,205)	-	10	18,308	See [1.3.8]
Prepayments and accrued income	379	-	-	(379)	-	See [1.3.9]
Deferred acquisition costs	1,661	-	-	(1,661)	-	See [1.3.10]
Other assets	1,352	(397)	(843)	420	532	See [1.3.11]
Deferred tax asset	-	-	-	79	79	See [1.3.12]
TOTAL	94,082	-	(13,131)	(4,759)	76,192	

- 1.3. The valuation principles applied to these assets are consistent with those used in the GAAP accounts, with the following exceptions:
  - 1.3.1 Tangible and intangible assets these are not recognised on the Solvency II balance sheet as they do not meet the valuation principles in Article 12 of the Commission Delegated Regulation (EU) 2015/35.
  - 1.3.2 Property property transactions which display debt-like features and are secured on underlying properties have been looked-through and considered with bonds and secured loans on the Solvency II balance sheet.
  - 1.3.3 Bonds and secured loans financial instruments displaying debt-like features have been looked through on the Solvency II balance sheet and recorded as bonds and secured loans. Further, the valuation has been adjusted to include accrued interest, which is included within accrued income in the GAAP balance sheet.
  - 1.3.4 Collective investment schemes investments in financial instruments for which a full look-through has been unavailable have been reclassified to collective investment schemes.
  - 1.3.5 Equity investments These have been adjusted to reflect investment returns.
  - 1.3.6 Intermediary receivables these have been reclassified to technical provisions.
  - 1.3.7 Reinsurance share of unearned premiums and other technical provisions these are not recognised on the Solvency II balance sheet as they are non-cash settled balances. Instead, the expected claims payable on unearned premiums are recorded within reinsurance share of technical provisions.
  - 1.3.8 Cash and cash equivalents financial instruments displaying features like debt or equity have been looked through on the Solvency II balance sheet and removed from cash and cash equivalents. The value of cash and cash equivalents has been adjusted to reflect accrued income.
  - 1.3.9 Prepayments and accrued income prepayments are not recognised on the Solvency II balance sheet as they are non-cash settled balances, whereas accrued income on cash and bonds have been reversed and included in the valuation of the underlying asset.
  - 1.3.10 Deferred acquisition costs these are not recognised on the Solvency II balance sheet as they are non-cash settled balances.
  - 1.3.11 Other assets other assets have been moved to technical provisions where they are technical in nature.
  - 1.3.12 Deferred tax asset valued based on the expected tax benefit once the valuation adjustments to transition to solvency valuations unwind.

#### 2. Technical Provisions

2.1 The GAAP accounts of both the Group and the Company include provisions for claims incurred based on earned premiums which consider all reasonably foreseeable best estimates. This includes reserves for claims incurred plus a provision for claims Incurred But Not yet Reported ('IBNR'). The Group and the Company also considers any amounts recoverable from reinsurance contracts in respect of its claims reserves and IBNR. All data in section [2] below relates to both the Group and the Company unless stated.

2.2 The technical provisions by line of business are as follows:

As at 31 December 2017:

Line of business	Technical provisions (excluding risk margin) (£'000)	Risk margin (£'000)	Technical provisions (£'000)
Motor vehicle liability insurance	11,942	66	12,008
Other motor insurance	2,597	3	2,600
Fire and other damage to property	3,899	688	4,587
General liability	22,190	496	22,686
Credit and suretyship	322	138	460
Legal expenses	68	-	68
Total	41,018	1,372	42,389

As at 31 December 2016:

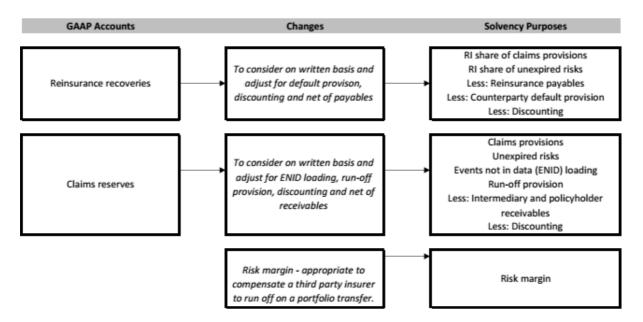

Line of business	Technical provisions (excluding risk margin) (£'000)	Risk margin (£'000)	Technical provisions (£'000)
Motor vehicle liability insurance	21,463	339	21,802
Other motor insurance	6,829	63	6,892
Fire and other damage to property	5,416	800	6,216
General liability	22,452	1,020	23,472
Credit and suretyship	(1,565)	207	(1,358)
Legal expenses	33	-	33
Total	54,628	2,439	57,057

Negative technical provisions arise where future premiums exceed provisions for claims.

- 2.3 The key areas of uncertainty around technical provisions are as follows:
  - 2.3.1 Estimation of outstanding loss reserves ("OSLR") while information about claims is generally available, assessing the cost of settling the claim is subject to some uncertainty.
  - 2.3.2 Estimation of the losses relating to claims IBNR this is generally subject to a greater degree of uncertainty than estimating the OSLR since the nature of the claims is not known at the time of reserving.
  - 2.3.3 Estimation of claims arising on business which have not yet expired ("unexpired risks") this is uncertain as the claims have not yet been incurred, but are expected to be incurred on the business which the Company has written.
  - 2.3.4 Market environment changes in the market environment increase the inherent uncertainty affecting the business. In particular, claims inflation, propensity for UK motor and liability claims to settle through periodic payment orders ('PPOs') and the

Legal Aid, Sentencing and Punishment of Offenders ('LASPO') Act have all impacted the market environment in recent years.

- 2.3.5 Events not in data ('ENID loading') estimating a provision for events not in data is subject to considerable uncertainty as the events being reserved have not been observed.
- 2.3.6 Run-off expenses the estimation of the change in expense base for run-off of the Company is inherently uncertain due to the estimations around the period of the run-off, base costs and inflation.
- 2.3.7 Risk margin the risk margin, being the margin payable to transfer the business to another insurance carrier, is uncertain due to the requirement to forecast future solvency capital requirements over the period of a run-off. This therefore shares the same uncertainties of the run off expenses provision considered at [2.3.6], as well as the inherent uncertainties around forecasting future solvency capital requirements.
- 2.4 The Company manages the risks around these uncertainties via the following actions:
  - 2.4.1 Ongoing monitoring of claims, including regular reviews of claims handling functions.
  - 2.4.2 Maintaining a number of reinsurance arrangement to limit the impact of adverse claims development (see [2.8]).
  - 2.4.3 Internal controls through the underwriting committee and actuarial function which monitor claims development and reinsurance arrangements.
  - 2.4.4 Regular external actuarial reviews.
- 2.5 The changes required to transition from GAAP accounts to technical provisions for solvency purposes are consistent, and are noted below:

We shall consider each of these adjustments to transition from GAAP accounts to solvency technical provisions.

2.5.1 Claims provisions – The Company and Group has adjusted its claims provision in its GAAP accounts in recording the claims provisions for solvency purposes as at 31 December 2017 to reclassify balances of a technical nature from other debtors and creditors to technical provisions and to consider the impact of contract boundaries. The claims provisions as at 31 December 2017 were £44,601k (2016: £50,309k). Other than reclassifications and adjustment as a result of consideration of contract

boundaries, there have been no further adjustments resulting from reserving methodologies (2016: reduction in the GAAP gross reserves by £373k).

- 2.5.2 Reinsurance share of claims provisions The Company and Group has adjusted its reinsurance recoveries in its GAAP accounts in recording the reinsurance share of claims provisions for solvency purposes as at 31 December 2017 to reclassify balances of a technical nature from other debtors and creditors to technical provisions and to consider the impact of contract boundaries. The reinsurance share of claims provisions as at 31 December 2017 were £39,458k (2016: £32,769k). Other than reclassifications and adjustment as a result of consideration of contract boundaries, there have been no further adjustments resulting from reserving methodologies (2016: reduction in the GAAP gross reserves by £92k).
- 2.5.3 Unexpired risks The Company and the Group have estimated the claims which will be payable on unexpired risks (sometimes termed 'premium provisions') based on the ultimate loss ratios and large loss experience from the claims provisions. The premium provision as at 31 December 2017 is £4,664k (2016: £14,643k).
- 2.5.4 Reinsurance share of unexpired risks The Company and the Group have estimated the amounts recoverable on unexpired risks (sometimes termed 'reinsurance share of premium provisions') based on the ultimate loss ratios and large loss experience from the claims provisions. The reinsurance share of premium provisions as at 31 December 2017 is £2,433k (2016: £10,397k).
- 2.5.5 Intermediary and policyholder receivables Intermediary and policyholder receivables are netted off the technical provisions for solvency purposes. There are no valuation differences between GAAP accounts and intermediary and policyholder receivables for solvency purposes other than to recognise additional recoverable amounts as a result of considering contract boundaries. The insurance receivables as at 31 December 2017 are £9,528k (2016: £10,494k).
- 2.5.6 Other receivables and payables in technical provisions Other receivables and payables, notably claims funds held by intermediaries and commissions payable to intermediaries, are netted off the technical provisions for solvency purposes. The Company and the Group have estimated the other receivables and payables which will be payable on premium provisions and added these to those recorded in the GAAP accounts in respect of the claims provisions. The net receivables as at 31 December 2017 were finil (2016: £602k).
- 2.5.7 Reinsurance payables Net reinsurance payables are netted off the reinsurance recoveries for solvency purposes. There are no valuation differences between GAAP accounts and net reinsurance payables for solvency purposes other than to recognise additional recoverable amounts as a result of considering contract boundaries. The reinsurance payables as at 31 December 2017 are £1,189k (2016: £1,794k).
- 2.5.8 Events not in data loading Technical provisions for solvency purposes are required to allow for all possible events, including those that may not have been historically realised before. Such events not presented in a set of observable historical loss date are often called Events Not In Data ("ENID"). This is a difference in valuation methodology compared to the GAAP accounts which consider best estimates which can be reasonably foreseen, and therefore leads to a loading on the technical

provisions to consider the probability weighted effect of events which have not previously been observed.

The Company and Group have undertaken an assessment of previously unobserved events for each line of business and sought to consider the probability weighted effect of such events and, given the business model, believe that such unobserved events are unlikely. As such, the ENID loading applied by the Company and the Group as at 31 December 2017 was £353k (2016: fnil).

2.5.9 Counterparty default provision – The Company and the Group have considered a provision for default by one or more of its reinsurance providers. The provision is based on the total exposure to the counterparty, the rating of the counterparty and the existence of any collateral arrangements with the counterparty. The Company and Group estimate the counterparty default provision and consider each of the exposures, net of collateral arrangements in existence, apply the estimated probability of default by rating, and derive a weighted average probability of default.

The Company and Group have calculated the weighted average probability of default of reinsurers as 0.20% (2016: 0.07%), and thus the counterparty default adjustment is £166k (2016: £48k).

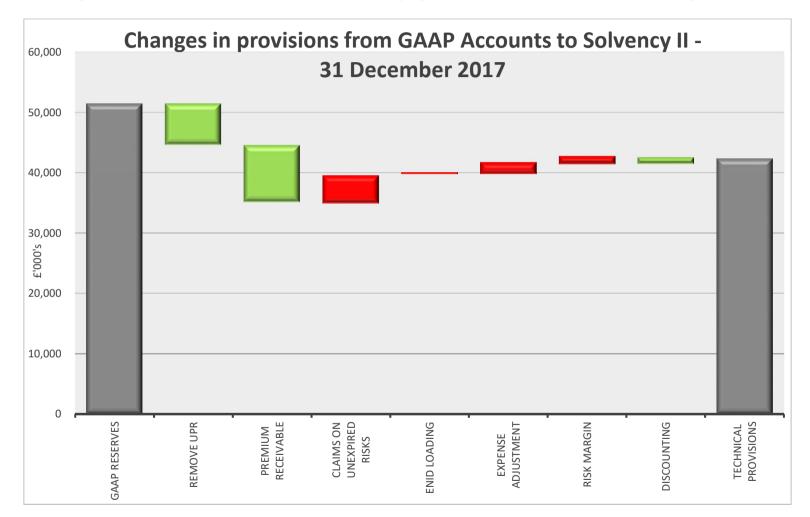

2.5.10 Run-off provision – Technical provisions for solvency purposes are required to take account of all expenses that will be incurred in servicing insurance obligations. This is commonly referred to as a 'run-off' provision as it therefore considers all future expenses which would be incurred to allow the existing obligations to run-off.

The Company and the Group have considered a run-off period of seven years and estimated the level of future expenses based on the current level of expenses, considering the decrease in activity in the period, underlying expense inflation and an estimated minimum level of costs which would be incurred in any one year. The run-off provision applied by the Company and the Group as at 31 December 2017 was £2,039k (2016: £1,596k).

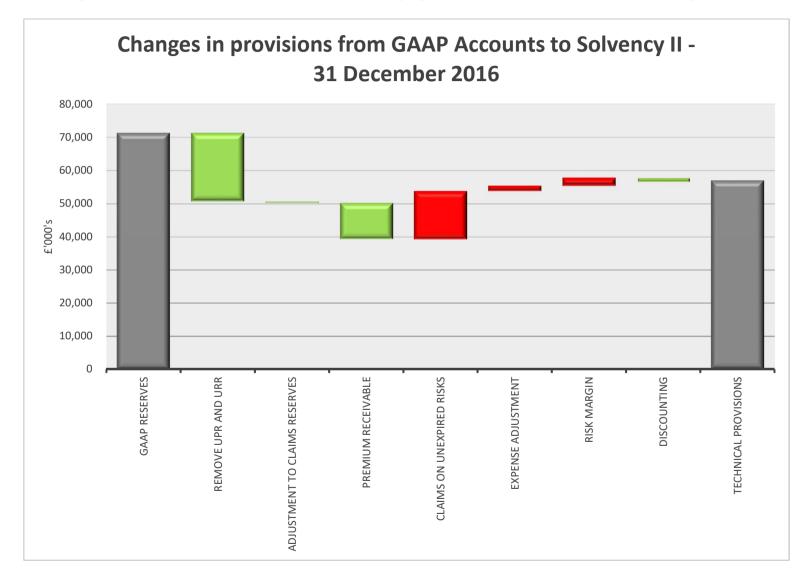

- 2.5.11 Discounting Discounting has been applied in the technical provisions based on a weighted average of the yield curves as at 31 December 2017 as issued by the European Insurance and Occupational Pensions Authority ("EIOPA"). The impact of discounting on the technical provisions is £1,111k (2016: £820k), and on the reinsurance share of technical provisions the impact of discounting is £166k (2016: £433k).
- 2.5.12 Risk Margin The risk margin has been considered to ensure that the value of the technical provisions is equivalent to the amount that would be expected to have to be paid to a third party insurance company in order to take over and meet the insurance obligations of the Company. The risk margin has been calculated based on the estimated capital requirements to run off the Company's obligations, and applying a cost of capital of 6%.

The capital required to run-off the portfolio is based on the future estimated SCRs, taking account of underwriting risk and reinsurance counterparty risk. This results in a risk margin of £1,372k (2016: £2,429k).

2.6 Neither the Group nor the Company have applied the matching adjustment, volatility adjustment, transitional risk-free interest term structure or the transitional deduction in calculating its technical provisions.

2.7 The changes to technical provisions as at 31 December 2017 highlighted above are reflected in the waterfall diagram below:

The changes to technical provisions as at 31 December 2016 highlighted above are reflected in the waterfall diagram below:

- 2.8 The key reinsurance arrangements in place are as follows:
  - 2.8.1 Motor vehicle liability and other motor insurance The Company caps its underwriting risk at £750k for UK policies via a nonproportional ("XoL") treaty. The panel of reinsurers in the XoL treaty are predominately counterparties with good ratings from a well-known rating agency. The Company also has a proportional ("QS") treaty with two well rated counterparties, which limits the Company's underwriting risk to 25% of the total exposure, after large losses are recovered from the XoL treaty (i.e. "net losses").
  - 2.8.2 Liability The Company caps its underwriting risk at £500k for UK business or €650k for European business via an XoL treaty with well rated counterparties. The Company also has a QS treaty in place which limits the Company's underwriting risk to 25% of the net losses.
  - 2.8.3 Credit and suretyship The Company has a QS treaty with a well rated counterparty in respect of its Italian bonds, limiting the Company's underwriting risk to 35% of the net losses. There are no other reinsurance arrangements for this or any other line of credit and suretyship business, other than some variable QS placements on the Norwegian business.
  - 2.8.4 Legal expenses The Company has a QS treaty with a well rated counterparty, limiting the Company's underwriting risk of the net losses to nil.

#### 3. Other Liabilities

3.1 As at 31 December	2017, the	Group	recorded	the	following	classes	of	liabilities for s	solvency
purposes:									

Liability	GAAP Accounts Value (£'000)	Solvency Value (£)	Explanation of Differences
Subordinated debt	5,000	-	Reclassified to tier 2 capital. See section E.
Accruals and deferred income	868	511	Reversal of deferred income
Reinsurance accounts payable	13,252	-	Commissions payable to intermediaries reclassified to technical provisions (see [2.5.6])
Other creditors, including corporation tax and IPT	647	233	Reclassification of technical balances to technical provisions

There have been no valuation adjustments for solvency purposes.

As at 31 December 2016, the Group recorded the following classes of liabilities for solvency purposes:

Liability	GAAP Accounts Value (£'000)	Solvency Value (£)	Explanation of Differences
Subordinated debt	5,000	-	Reclassified to tier 2 capital. See section E.
Accruals	595	595	Not applicable
Reinsurance accounts payable	1,794	-	Commissions payable to intermediaries reclassified to technical provisions (see [2.5.6])
Other creditors, including corporation tax and IPT	1,893	1,893	Not applicable
Derivative liabilities	-	420	See [1.3.12]

3.2 As at 31 December 2017, the Company recorded the following classes of liabilities for solvency purposes:

Liability	GAAP Accounts Value (£'000)	Solvency Value (£'000)	Explanation of Differences
Subordinated debt	5,000	-	Reclassified to tier 2 capital. See section E.
Accruals and deferred income	957	498	Reversal of deferred income
Reinsurance accounts payable	13,252	-	Reclassified to technical provisions (see [2.5.7])
Other creditors, including corporation tax and IPT	647	135	Not applicable

There have been no valuation adjustments for solvency purposes.

As at 31 December 2016, the Company recorded the following classes of liabilities for solvency purposes:

Liability	GAAP Accounts Value (£'000)	Solvency Value (£'000)	Explanation of Differences
Subordinated debt	5,000	-	Reclassified to tier 2 capital. See section E.
Accruals and deferred income	572	572	Not applicable
Reinsurance accounts payable	1,794	-	Reclassified to technical provisions (see [2.5.7])
Other creditors, including corporation tax and IPT	1,886	1,886	Not applicable
Derivative liabilities	-	420	See [1.3.12]

There have been no valuation adjustments for solvency purposes.

#### 4. Alternative Methods for Valuation

Not applicable for the Group or the Company.

#### 5. Any Other Information

Not applicable for the Group or the Company.

### E. Capital Management

#### 1. Own Funds

- 1.1. The Group and the Company undertake an Own Risk and Solvency Assessment ('ORSA') exercise at least annually, or when the risk profile of the Group or the Company changes. The ORSA exercise incorporates the business planning process which is typically considered over a three-year time horizon. There have been no significant changes in the reporting period.
- 1.2. The Company and Group classifies its own funds as tier 1, tier 2 or tier 3 depending on the characteristics of the capital. Tier 1 capital is the best form of capital for the purposes of absorbing losses.

The Group's own funds are as follows.

		2017		2016	
Own fund item	Tier	£'000	%	£'000	%
Share capital and share premium	1	1,988	14	1,988	15
Reconciliation reserve	1	7,000	50	6,252	47
Subordinated debt	2	5,000	36	5,000	38
Deferred tax asset	3	-	-	79	1
		13,988	100	13,319	100

The Company's own funds are as follows.

		2017		2016	
Own fund item	Tier	£'000	%	£'000	%
Share capital and share premium	1	2,000	13	2,000	12
Reconciliation reserve	1	8,666	55	9,177	56
Subordinated debt	2	5,000	31	5,000	31
Deferred tax asset	3	124	1	79	1
		15,790	100	16,256	100

The reconciliation reserve represents retained earnings and reconciliation adjustments from GAAP balance sheet to SII balance sheet.

1.3. The movement in own funds during the year ended 31 December 2017 is shown overleaf:

	GROUI	P	COMPANY	
	£'000	£'000	£'000	£'000
(Deficit)/surplus at 31 December 2016		(1,174)		1,127
Loss per management accounts	(764)		(60)	
Adjustments to reconcile GAAP to SII profit:				
Changes in disallowable assets	1,870		1,981	
Change in RI counterparty default provision	(118)		(118)	
Change in risk margin and expense adjust.	1,057		615	
Change resulting from discounting	(231)		(231)	
Net changes in premium provisions, ENIDs, etc	(1,828)		(2,623)	
Other changes (including deferred tax)	844		(30)	
Solvency II loss		669		(466)
Previous period SCR	14,493		15,129	
Current period SCR	11,378		11,710	
Decrease in SCR		3,116		3,419
Surplus as at 31 December 2017		2,610		4,080

1.4. The eligible capital which may be used towards meeting the Solvency Capital Requirement ('SCR') and Minimum Capital Requirement ('MCR') of the Company are as follows:

		20	)17	2016		
	Eligible capital for the Eligible capital		pital for the			
Own fund item	Tier	SCR (£'000)	MCR (£'000)	SCR (£'000)	MCR (£'000)	
Share capital and share premium	1	2,000	2,000	2,000	2,000	
Reconciliation reserve	1	8,666	8,666	9,177	9,177	
Subordinated debt	2	5,000	650	5,000	815	
Deferred tax asset	3	124	-	79	-	
		15,790	11,316	16,256	11,992	

- 2. Solvency Capital Requirements & Minimum Capital Requirements
- 2.1. The SCR of the Group as at 31 December 2017 was £11,378k. The SCR of the Company as at 31 December 2017 was £11,710k. The MCR of the Company as at 31 December 2017 was £3,251k.
- 2.2. The SCR of the Company and Group is made up as follows:
  - 2.2.1. The Company and the Group are exposed to market risks derived predominately from the assets held by the Company and the Group to meet its insurance liabilities,

	20	17	2016		
MARKET RISK	Company (£'000)	Group (£'000)	Company (£'000)	Group (£'000)	
Interest rate risk	70	74	188	166	
Spread risk	281	256	614	314	
Equity risk	1,538	1,538	595	595	
Currency risk	291	302	608	608	
Property risk	1,639	1,639	1,958	1,958	
Concentration risk	5,755	5,266	2,860	671	
Market risk diversification	(2,942)	(2,868)	(2,549)	(1,283)	
MARKET RISK TOTAL	6,632	6,207	4,273	3,029	

although exposures to shocks in interest rates and currency rates also considered in the exposure from underwriting risks.

2.2.2. The Company and Group are exposed to counterparty risks in the form of cash deposits and recoveries from reinsurers (type 1) and from receivables from intermediaries, policyholders and other debtors (type 2).

	20	17	2016		
COUNTERPARTY RISK	Company (£'000)	Group (£'000)	Company (£'000)	Group (£'000)	
Type 1 risk	693	700	1,725	1,746	
Type 2 risk	-	-	1,574	1,574	
Market risk diversification	-	-	(213)	(213)	
COUNTERPARTY RISK TOTAL	693	700	3,086	3,107	

2.2.3. The Company and Group are exposed to non-life underwriting risk as a result of the insurance policies it sells. The risks are based on volatility around earned premiums and claims reserves, and to catastrophe events to which the Company and Group may be exposed.

	201	17	2016		
NON-LIFE UNDERWRITING RISK	Company (£'000)	Group (£'000)	Company (£'000)	Group (£'000)	
Premium and reserve risk	4,877	4,877	7,256	7,256	
Catastrophe risk	2,776	2,776	5,040	5,040	
Non-life diversification	(1,468)	(1,468)	(2,481)	(2,481)	
NON-LIFE UNDERWRITING					
RISK TOTAL	6,185	6,185	9,815	9,815	

2.2.4. The final solvency capital requirement of the Company and the Group is the aggregation of the market, counterparty and non-life underwriting risks, less a credit for diversification, and then an additional charge to represent the operational risks faced by the Company and the Group.

	20	017	2016		
SOLVENCY CAPITAL	Company	Group	Company	Group	
REQUIREMENT	(£'000)	(£'000)	(£'000)	(£'000)	
Market risks	6,632	6,207	4,273	3,029	
Counterparty risks	693	700	3,086	3,107	
Non-life underwriting risks	6,185	6,185	9,815	9,815	
Basic SCR diversification	(3,031)	(2,945)	(3,684)	(3,097)	
Operational risks	1,231	1,231	1,639	1,639	
SOLVENCY CAPITAL					
REQUIREMENT	11,710	11,378	15,129	14,493	

- 2.3. Neither the Company nor the Group have utilised simplified calculations in applying the standard model and there has been no use of undertaking specific parameters in the non-life underwriting risk calculations.
- 2.4. The inputs used to calculate the MCR of the Company are as follows:

	estimate a	surance) best and technical alculated as a whole	Net (of rei written pre the last 1	-
Line of business	2017 (£'000)	2016 (£'000)	2017 (£'000)	2016 (£'000)
Motor vehicle liability insurance	104	4,512	317	3,301
Other motor insurance	-	1,552	69	1,166
Fire and other damage to property	4,074	6,387	2,488	6,936
Liability	5,496	9,635	490	3,189
Credit and suretyship	1,334	1,392	3,028	3,526
Legal expenses	3	1	-	-

- 2.5. The risk profile of the Company and Group has reduced during the year ended 31 December 2017 as the Company ceased writing UK motor business on in March 2017, and the impacts from putting the liability book into run off in 2016 were seen in the technical provisions. Furthermore, the Company entered into a whole account quota share which further reduced the risk profile. As a result, the Company has taken additional risk on its investment portfolio, increasing the market risk charges. The reduction in SCR and MCR during the year reflect this change in risk profile.
- 3. Non-Compliance with the MCR and Non-Compliance with the SCR
- 3.1. The Company has maintained capital sufficient to meet its minimum capital requirement throughout the period covered by this report.
- 3.2. The Company has maintained capital sufficient to meet its solvency capital requirement throughout the period covered by this report.

3.3. The Solvency II rules allow insurance groups to take advantage of transitional arrangements in relation to meeting the solvency capital requirement subject to certain conditions being met. The Group took advantage of these transitional arrangements initially, but exited them in Q4 2017, reporting a solvency ratio of 123% at 31<sup>st</sup> December 2017.

#### 4. Any Other Information

The Directors do not consider that there is any further information which should be disclosed regarding the capital management of the Company or the Group.
